Chapter 2

Literature Survey

Let's Watch is an example of a Television Show Database Management Program where Television Shows from a smorgasbord of Channels such as CBS, BBC, The CW, Netflix, AMC, Amazon Prime Videos, etc. Although there are other platforms such as TV Time and Trakt.tv which provide the same functionality as Let's Watch, Let's Watch aims at a user-first approach where a user can request the addition of a new Television Show which does not already exist in the Let's Watch Database.
